EDUCATION

Adamson University
Bachelor of Science in Computer
Science
2021 - 2026

CORE SKILLS

- HTML
- CSS
- JavaScript
- React
- PHP
- Laravel
- Node.js

STRENGTHS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Adaptability
- Attention to Detail
- Communication

John Kenneth Araojo

Developer & IT Support Specialist

Computer Science Graduate | Web Developer | QA Enthusiast

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack web development, database management, software testing, and IT support. Proven ability to build responsive applications with React, Laravel, PHP, and MySQL while delivering reliable technical support and collaborating effectively across teams. Motivated to contribute clean code, user-focused solutions, and continuous improvement in fast-paced environments.

EXPERIENCE

Developer & IT Support Intern

2026

Company Name

- Provided tier-1/2 technical support and resolved hardware, software, and network issues for end users.
- Assisted in developing and maintaining internal web applications using PHP, JavaScript, and MySQL.
- Collaborated with developers to debug systems, document fixes, and improve application reliability.
- Supported deployment, testing, and user onboarding to enhance overall operational efficiency.

Web Development Projects

2022 - 2026

Academic & Personal

- Designed and built full-stack web systems including inventory, event, and help desk platforms.
- Implemented responsive UI, RESTful integrations, and database-driven features with Laravel and React.
- Applied QA practices including functional testing, validation workflows, and issue tracking.

FEATURED PROJECTS

Sentiment Analysis System

Python

TensorFlow

Keras

AI/ML

Built an AI-powered sentiment analysis pipeline using the GoEmotions dataset with model training, evaluation, and text classification output.

Help Desk Management System

PHP

Laravel

Blade

MySQL

Developed a ticket-based IT support platform with role-based access, status tracking, and admin dashboards for issue resolution.

PROJECT PORTFOLIO

Stock Management System

PHP | Laravel | Blade | MySQL

Engineered an inventory solution for stock monitoring, product movement logs, and automated low-stock alerts with reporting.

Unity 2D Game

Unity | C# | Game Dev

Designed and programmed a 2D game with player mechanics, collision handling, scoring systems, and polished UI flow.

CERTIFICATIONS

- SQL Certification | FreeCodeCamp
- Web Development Fundamentals | Sololearn
- Cybersecurity Certification | Certiport
- Networking Certification | Certiport

TECHNICAL SKILLS

Frontend

HTML | CSS | JavaScript | React | Vite | Responsive Design | Figma

Backend & Data

PHP | Laravel | Node.js | MySQL | SQL | REST APIs

Languages

JavaScript | PHP | Python | Java | C# | SQL

Tools & QA

Git | Software Testing | Quality Assurance | Mobile Development

Currently Learning

Firebase | React Native | Advanced Backend APIs

STRENGTHS

Problem Solving | Analytical Thinking | Team Collaboration | Adaptability | Attention to Detail | Communication | Continuous Learning | Time Management
